Last night right before I fell  
asleep, I picked up a few things  
on Lisa "KING" (prominently)

4 (but I can't recall if it was  
right side up or upside down).

King may have been in blue  
letters too, fairly certain but  
not 100%. This morning I

saw

Very bright  
Very colorful  
The Star was  
big & bright.  
It was  
"definite"  
and so well  
defined,  
So bright  
& all lit up.

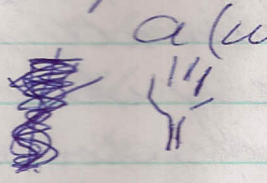

Okay, Lisa, we seem to be making  
great progress (ran out of ink and had  
to get a new pen). Anyway, what  
do you have for me today?

heard "Janet" while trying  
to make out the writing I was  
seeing. Writing... differently (?) not

formed cement  
drilling  
from mining

totally certain but think so. These  
"jokes" but different writing than  
the previous Of ones.

a (woman?) hand "raised up"  
sticking up from somewhere.  
Can't recall if it was left or right.

I see the inside of a car. Can  
only see the passenger seat window  
and a portion of the rear window

part of the  
head rest and  
seat. It felt  
like someone, (maybe female)

was in the seat, felt  
like there was a white pillow or  
something behind her head (maybe).  
Then I saw a cross +.  
The interior of the car frame  
was black.

Wow. Interesting. She showed  
me this space that was an opening,  
and saw a glass round thing  
it felt as if a magnifying glass  
was over it at first (symbolic,  
I'm sure). I see the opening to this  
pit, it's in stone but it smooth  
and very deep

glass round thing

This is @ Chew Plant

a MAN rises up from its depths.  
He's probably in his 40's, dark straight

brown hair, wore it combed back  
at the sides, in a semi 'feather' look  
but not really feathered. Reminded  
me of my dad somehow.

He was med tan skin, orangy ~~tan~~ <sup>color</sup>  
but not dark and not light.

I heard "John Spira" but I'm  
not sure if that is my own  
projection or not since I'm so  
familiar with the other aspects of  
these cases. However, I don't  
think my conscious mind was  
thinking John... wait a minute.  
I got "differently" and a different  
John. Wow. This is John Spira

Lisa, are you near John Spira  
No. Is there a connection to  
Spira and you? Yes. The  
pill, I see a hand holding a  
capsule.

is holding it or showing it to me.

They have their finger in the right  
'hole' of the cassette tape. It  
feels like ~~the~~ the image is from  
the inside of a car.

I see a hand coming out of  
some where, left hand and  
it's almost wavy but slowly

but it's trying to get my attention  
and saying "Here. I'm over here!"

I asked where is here. They  
said "Look down." Look down  
where? "Go North" "play"  
playdown? North of Lisa.

2 miles. is *is* *not* *psychic message*  
(Lisa's in the well. The cisterns.)

It dup. go north, 20 paces,  
go right. look down. The  
pill. play.

Talked to [redacted] and [redacted]  
after this. I am awestruck by  
this info. Let me see if I can  
get anything else.

Handwriting "play" "female"  
saw it, just like that → with the  
arrow ← pointing at the word "female"  
"Triple play" seeing writing, lots  
of it, heard. "John" "prescription"  
"septic".

a line of taper  
candles. Some  
are lit, and

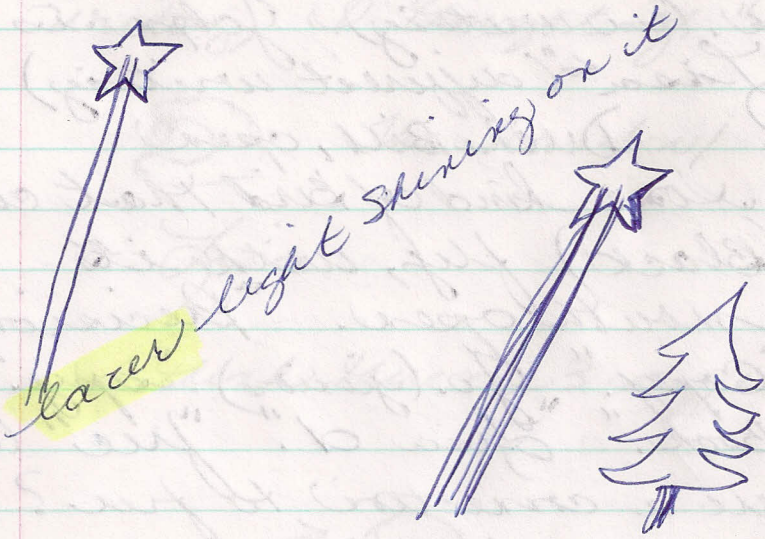

some are not. Some lit and  
are going out. "You are in"  
in writing. Helicopter blades spinning  
rapidly but it wasn't a helicopter  
it was some odd bug shaped thing

7 Tntntn (Bldgs) seemed industrial  
Heard "printing press." dark.
